3D FORMED PANEL COLLECTION

CURTAIN..... 04

COLUMN 06

The embossed acoustic panel collection represents the latest innovation from Woven Image. Made using recycled plastic, this design-led collection embraces the trend towards tactile surfaces and three-dimensional textures, interweaving cutting-edge design with sustainability and commercial performance.

Available in four unique designs; Zen, Ion, Gem and Pico, which have been specially designed to provide a floor-to-ceiling acoustic solution for commercial office interiors and pattern matches for continuous wall and double-height installations.

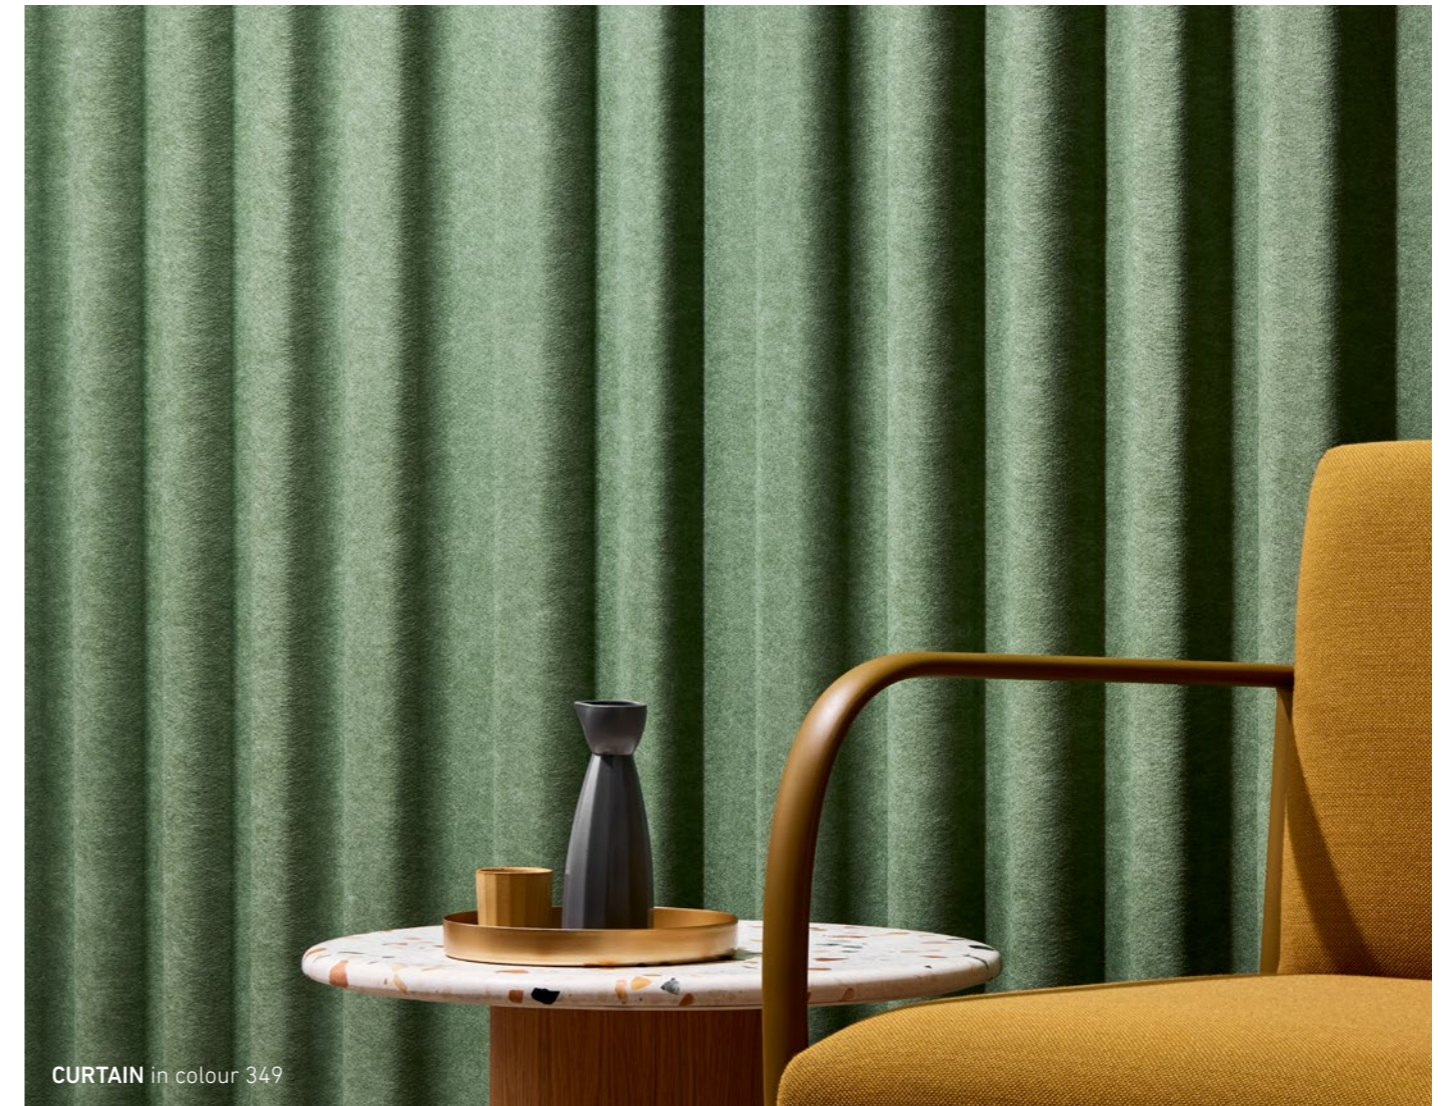

The collection has won numerous international design awards including; The Designer Award for Innovation in Material Product Design, the Dezeen Award for Workplace Design, the FX Design Award for Best Surface, the Architizer Award for A+ Products and an INDE Award.

The uniqueness of the design was observed instantly by the Dezeen Awards judges who said that "in this instance, there was an attempt to define the space in sculptural terms and also give the product tactility". The Dezeen Awards received more than 4,300 entries, from 85 countries across 5 continents.

3D FORMED PANEL COLLECTION

CURTAIN

CURTAIN in colour 349

Displays as a beautiful contemporary macro design where the non-woven material appears to ebb and flow across the panel, creating a 'curtain effect'.

EMBOSSSED PANEL COLLECTION

ION

ION in colour 573

ION's design is more organic, with multiple triangles that enjoin to make an intricate raised profile. The angled facets that occur from the geometric pattern reference the shapes of origami and folded paper.

COLOURS

Available in 20 colours from the Mura range - **see page 1**
