Established in 1987, Woven Image is an international interior finishes company with sustainability and design leadership at its core. From humble beginnings in Sydney, Woven Image now has offices throughout Australia as well as Singapore, Hong Kong and China, and a network of distributors and stockists across all major markets including Europe and the UK, Asia and the Middle East, and the Americas.

The product portfolio consists of acoustic finishes such as EchoPanel®, suitable for wall, ceiling and space dividing applications in interior spaces including workplace, hospitality, education and healthcare sectors.

**OUR ENVIRONMENTAL STORY**

The Woven Image portfolio has been designed with dematerialization, upcycling and lifecycle management front of mind. All base materials in this collection utilize recycled or waste materials and printed designs use non-toxic inks with low VOCs.

Woven Image achieves first-class environmental certifications for its key products, including Global GreenTag™ certification (GreenRate Level A), with the maximum Product Health Declaration™ Platinum Health and an Environmental Product Declaration (EPD). As a result, specifying these products can secure credits under sustainable building tools including Leadership in Energy and Environmental Design (LEED v4.1), WELL™ Building Standard and Green Star. Woven Image is also a long-term supporter of GreenFleet and offsets its carbon emissions through their bio-diverse program.
Invented and launched by Woven Image in 2004, EchoPanel® is the original decorative interior paneling solution, with acoustic qualities and eco-innovation at its core. EchoPanel® production uses post-consumer recycled PET bottles to create a superior upcycled product, with a 10-year life expectancy, after which the material is still 100% recyclable. Since 2022, Woven Image have also committed to offset the embodied carbon of EchoPanel® acoustic panels to zero.

EchoPanel® is available in a comprehensive range of neutral, mid tone and vibrant colors. Due to its unique manufacturing process, the color remains consistent throughout the depth of the panel.

EchoPanel® is pinnable, durable, lightweight and easy to cut and install, making it ideal for a multitude of wall, ceiling and free-standing commercial interior applications. Available in 0.47” (12mm) and 0.94” (24mm) thicknesses.

Woven Image have created design-driven and easy-to-install acoustic ceiling solutions for use in commercial interior spaces.

EchoPanel® Array is a fully scalable acoustic ceiling system that accommodates 0.47” (12mm) and 0.94” (24mm) EchoPanel® baffles.

Delivering high acoustic performance, Array controls reverberated noise in shared spaces. Choose from our beautifully crafted baffles in the extensive EchoPanel® color palette, or work with us to create your own unique designs. Featuring streamlined aluminum hardware, Array has been engineered for easy installation, and can be used in both ceiling or wall applications.

Fuji tiles are decorative 3D formed tiles offering superb acoustic absorption. Designed to integrate into the Array hardware, tiles are quick and easy to install with options of direct-fix to ceiling or suspension.

EchoPanel® Element comprises a series of cut EchoPanel® blades which slot together to provide a direct fix, grid or suspended acoustic ceiling solution.

Woven Image can also support your interiors project with custom ceiling solutions, including baffle systems. Contact your Woven Image representative for more information.

MURA is an innovative and versatile, 0.075” (1.9mm) thick, surface finish that is highly cost effective and easy to install. The face side has been designed to create a smooth clean look, whilst the back has been engineered with a forgiving texture that can be adhered to a variety of surfaces including walls, workstation screens and operable walls.

MURA boasts an on-trend color palette and print designs. Made from 60% recycled PET with low VOCs, MURA has the same first-rate environmental certifications as EchoPanel®.

The embossed acoustic panel collection represents the latest innovation from Woven Image. Made using recycled plastic, this design-led collection embraces the trend towards tactile surfaces and three-dimensional textures, interweaving cutting-edge design with sustainability and commercial performance.

Available in four unique designs; Zen, Ion, Gem and Pico, which have been specially designed to provide a floor-to-ceiling acoustic solution for commercial office interiors and pattern matches for continuous wall and double-height installations.

The collection has won numerous international design awards including: The Designer Award in 2022 for Innovation in Material Product Design, the Dezeen Award for Workplace Design, the FX Design Award for Best Surface in 2020, the Architizer Award for A+ Products and an INDE Award.

The uniqueness of the design was observed instantly by the Dezeen Awards judges who said that “in this instance, there was an attempt to define the space in sculptural terms and also give the product tactility”. The Dezeen Awards received more than 4,300 entries, from 85 countries across 5 continents.

Whether your interiors project requires large scale coverage or to create smaller design features, this range provides an endless stream of design configurations that provide great aesthetics whilst controlling reverberated noise in:

- Collaborative workspaces and meeting rooms
- Classrooms and music rooms
- Cafés and restaurants
- Lobbies and public spaces

They are lightweight, easy to install, and pattern match without the need for trimming.

Tiles in this collection are made from EchoPanel® or MURA, which achieves first-rate environmental certifications.
